EXPERIMENT 7 NAME:MITHULESH J

ROLLNO:240701313

Aim

To experiment with different layouts and color schemes for an Online Food Ordering mobile application and evaluate user feedback on aesthetics and usability using **GIMP**.

Tools Used

- GIMP (GNU Image Manipulation Program)
- Sample mobile UI screens (Food Ordering App)

Procedure

Step 1: Create Base UI Design

- Designed a basic food ordering app screen:
    - Home page with food items
    - Navigation bar
    - Search bar
    - Food cards with image, price, rating

Step 2: Create Different Layouts using GIMP

Three layout variations were created:

Layout 1: Grid Layout

- Food items displayed in grid format
- Two columns
- Compact design

Advantage:

- Shows more items at once

Disadvantage:

- Slightly cluttered

Layout 3: Card-Based Layout

- Each item shown as a card with shadow
- Rounded corners

Advantage:

- Modern look
- Better user focus

Disadvantage:

- Fewer items visible

Layout 3: Card-Based Layout

- Each item shown as a card with shadow
- Rounded corners

Advantage:

- Modern look
- Better user focus

Disadvantage:

- Fewer items visible

Color Scheme 2: Dark Theme

- Black background
- White text
- Green highlights

Feedback:

- Attractive but slightly hard to read

Color Scheme 3: Colorful Theme

- Gradient backgrounds
- Bright colors

Feedback:

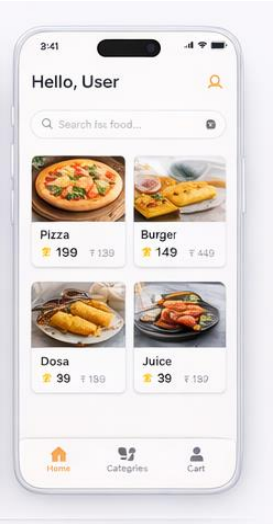
- Eye-catching but distracting

Step 4: Collect User Feedback

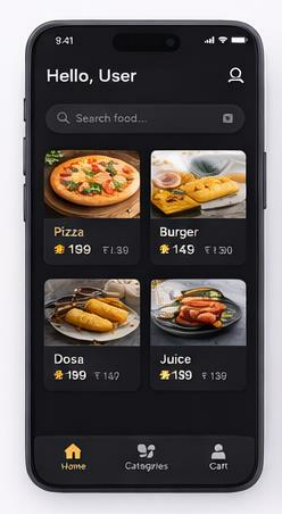
Feedback was collected from 5 users based on:

- Aesthetics (Look & Feel)
- Usability (Ease of use)

Light theme



dark theme



colourful theme
